Professional Summary

Java Full Stack Developer with hands-on experience building secure REST APIs using Spring Boot, Spring Security (JWT), Spring Data JPA, and MySQL. Skilled in layered architecture, authentication, role-based access control, and relational database design. Proficient in HTML, CSS, JavaScript, and React.js, with full-stack projects in HR management, e-commerce, and music streaming. Seeking an entry-level Java Backend or Junior Full Stack Developer role.

Professional Experience

Software Development Intern | HyperGrid Technology Solutions | Hyderabad, India | Mar 2025 – Nov 2025

Project : KartNest | Java, Spring Boot, MySQL, React.js, REST APIs, Email OTP

- Developed backend services for KartNest, an agriculture e-commerce platform, including an email-based OTP authentication system that secured user registration and login.
- Designed & implemented RESTful APIs with full CRUD operations for product catalog and shopping cart.
- Built responsive admin and user dashboards using React.js, integrating them with REST APIs to display product, cart, and order data in real time.

Education

M.Tech, CSE | Jayaprakash Narayana College of Engineering | 2026 – 2028 (Pursuing)

B.Tech, CSE | Brilliant Institute of Engineering and Technology | CGPA: 7.0 | 2019 – 2023

Technical Skills

Backend: Java, Java 8 (Streams, Lambda, Collections), Spring Boot, Spring MVC, Spring Data JPA, Spring Security, JWT, Hibernate, REST APIs

Database: MySQL, SQL (Joins, Subqueries, Normalisation, DDL, DML)

Frontend: HTML, CSS, JavaScript, React.js (Components, Hooks, State, Props, Routing)

Tools and Concepts: Git, GitHub, Maven, Postman, IntelliJ IDEA, Eclipse, Exception Handling, Layered Architecture, DTOs, Validation

Projects

LogSnap – Employee Attendance & Payroll Management System

- Built a backend HR management system using Spring Boot and MySQL to manage employee records, attendance tracking, salary slip generation, and payroll data.
- Implemented JWT-based authentication and role-based authorisation (Admin/Employee), and developed secure REST APIs for employee management, attendance, and salary slips, with Spring Data JPA.
- Developed React.js dashboards for employee management, attendance, and payroll, integrating them with the REST APIs for a complete full-stack workflow.

Tech Stack: Java, Spring Boot, Spring Security JWT, Spring Data JPA, MySQL, React.js, REST APIs.

PlayMe – Music Streaming Application

- Developed a music streaming application using Spring Boot with a layered architecture (Controller, Service, Repository), implementing RESTful APIs for managing songs, playlists, and user interactions.
- Designed a relational database schema in MySQL and implemented CRUD operations using Spring Data JPA and Hibernate for ORM-based persistence.

Tech Stack: Java, Spring Boot, Spring Data JPA, Hibernate, MySQL, React.js, REST APIs

Additional Information

- Learning backend system design and microservices concepts to build scalable Java applications.
- Quick learner who works well in teams and can clearly explain APIs and backend workflows.
